Agenda

Welcome by the host Serap Kurbanoğlu from Hacettepe University.

Evaluation of Final Event

A general evaluation of Final Event which took place the day before was carried out. Partners shared their observations. Partners agreed that it was a success both regarding the number and profile of the participants and their interest towards the content. There were 121 participants from ten different countries and 18 different cities. Participants are composed by librarians (60 – from university, school and public libraries), students (31 - from three different universities), academics (28 – from 8 different universities) and 2 participants one from an NGO the other one from a vendor organization). During the final event project, its aims, methodologies and outcomes were introduced. Phases of service co-design with users were presented along with the methodologies used in each phase (e.g. Lego Serious Play, Business Model Canvas, Crowdsourcing). Hands on activities included. Training on certain themes such as Green Libraries, Branding, Gamification and Innovative Tools provided. Each partner also presented the services they developed during the project.

It was decided to send a web-survey to all participants and include it in the final evaluation report. Web survey was prepared in two languages (English and Turkish) and sent to participants.

Administrational Issues

The coordinator collected the travel documents from previous meeting as well as the staff time sheets. All the other administrative documents required before finishing the project was discussed and agreed.

Intellectual Outputs

Intellectual outputs which already completed and which needs to be completed before the deadline 30th of August 2016 were discussed. A “to do list” was prepared and all partners agreed to deliver final outcomes before the end of July.

To do list is as follows:

1. All administrative documents will be send to coordinator by mid August the latest.
2. Short descriptions of services for web will be completed and published (only Lithuania)
3. Long description of services with all support documents, and links will be provided (only Germany)
4. Feedback on Brickme platform will be provided
5. All corrections in the previous documents (matrix and partner workshop reports) according to the final services (if services are changed) will be completed.
6. Translation of the MOOC to partner languages will be completed (ppts, video files with sound recording, sound files will be provided for coordinator to publish on the project website
7. Each partner will publish translated MOOC on Udemy platform.
8. Final newsletter will be published (by ISES)
9. Final version of OER (e-book) will be revised by Hacettepe (final revised documents will be provided by partners) and publish by ISES.
10. Discussion questions for each chapter in the MOOC will be generated and translated by partners to be included in the MOOC.

It was also decided that each partner will indicate a repreasantative who will be available to help (if necessary with additional information) during the preparation of final project report in August.
